INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 01005-0121WP	FOR FURTHER ACTION	See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)
International application No.	International filing date (day/mo	nth/year) Priority date (day/month/year)
PCT/US00/35560	29/12/2000	30/12/1999
	PC) or national classification and IPC	
Applicant		
ACRYMED et al.		
This international prelimina and is transmitted to the ap	ary examination report has been preparagelicant according to Article 36.	red by this International Preliminary Examining Authority
2. This REPORT consists of	a total of 6 sheets, including this cove	r sheet.
☐ This report is also acc	ompanied by ANNEXES i.e. sheets 0	f the description, claims and/or drawings which have a containing rectifications made before this Authority
These annexes consist of	a total of sheets.	
3. This report contains indica	itions relating to the following items:	1
ι ⊠ Basis of the re	eport	
II 🗆 Priority		
III 🛛 Non-establish	ment of opinion with regard to novelty	inventive step and industrial applicability
IV Lack of unity	of invention	
∨ ⊠ Reasoned sta	itement under Article 35(2) with regard explanations suporting such statemen	to novelty, inventive step or industrial applicability; t
Vì ☐ Certain docu		•
	ts in the international application	
	vations on the international application	n
	Tax	of completion of this report

EXAMINATION REPORT - SEPARATE SHEET

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

Claims 13-20 relate to subject-matter considered by this Authority to be covered 1. by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- Reference is made to the following documents: 1.
 - D1: GB-A-2 024 012 (JOHNSON & JOHNSON) 9 January 1980 (1980-01-09)
 - D2: EP-A-0 500 387 (EXOXEMIS INC) 26 August 1992 (1992-08-26)
 - D3: US-A-5 407 685 (KRALOVIC RAYMOND C ET AL) 18 April 1995 (1995-04-18) cited in the application
 - D4: US-A-5 928 174 (GIBBINS BRUCE L) 27 July 1999 (1999-07-27) cited in the application
 - D5: US-A-5 076 265 (WOKALEK HEINRICH) 31 December 1991 (1991-12-31)
 - D6: US-A-4 306 551 (HYMES ALAN C ET AL) 22 December 1981 (1981-12-22)
- The subject-matter of present claim 1 is not new according to Article 33(2) PCT. 2. Present claim 1 defines a matrix comprising a polymer network, a non-gellable polysaccharide and oxygen. This matrix must be suitable for the delivery of oxygen.
 - A gas will necessarily be delivered as soon as a concentration ingredient is provided. Consequently, if the matrix is placed in a vacuum, it will be able to delivery oxygen even if said matrix comprises only minor amounts of oxygen. Two of the documents cited in the search report already disclose wound dressings comprising a polymeric network and a non-gellable polysaccharide. D4 defines such a wound dressing in claim 6. D6 prefers karaya gum as the non-gellable polysaccharide (claims 1, 4 and 6). Since the matrices of D4 and D6 are not

EXAMINATION REPORT - SEPARATE SHEET

prepared under a protected atmosphere (e.g. nitrogen or argon), they will comprise oxygen, since oxygen is present in the normal air. Consequently the documents D4 and D6 are considered to be novelty destroying for present claim 1.

- 3. The subject-matter of present claim 13 is not new according to Article 33(2) PCT. Present claim 13 only defines a method using a biocompatible matrix. The term "matrix" is very broad. It is considered that the documents D1-D6 are novelty destroying for present claim 13. Cf. e.g. D1, p.1, l.5-7 and example; D2 claim 34; D3, claims 1 and 29; D4, col.1, l.4-10 and claim 6; D5, claims 1, 6 and 8; D6, examples and col.2, l.14-20.
- 4. With regard to dependent claims 2-12 and 14-20 it is noted that a positive opinion can only be given, if dependent claims refer to independent claims that meet the requirements of the PCT. However, at least some of these dependent claims do not contain any features which, in combination with the features of any claim to which they refer, might establish novelty and an inventive step over D1-D4 (Articles 33(2) and 33(3) PCT).
- 5. For the assessment of the present claims 13-20 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
- 6. Claims 14-20 refer to claim 13. Claim 13 defines a method of treating compromised tissue (i.e. a process). Claims 14-20 define a matrix (i.e. a product). Claims can refer only to claims of the same category. This change of category renders the subject-matter of claims 14-20 unclear (Article 6 PCT). For the purpose of examination it has been assumed that claims 14-20 define a "method according to claim 13 (or 17) wherein".
